Growing Renewable Agriculture in Africa  
with Classic Education

# *Table of Contents*

- How G.R.A.A.C.E. was started
- Mission Statement and Goal
- Nutrition
- Agriculture
- Classic Education
- Global Sanitation Solutions and G.R.A.A.C.E.

# *How G.R.A.A.C.E. Was Started*

**This picture depicts the little girl who has inspired our lives  
and the organization G.R.A.A.C.E.**

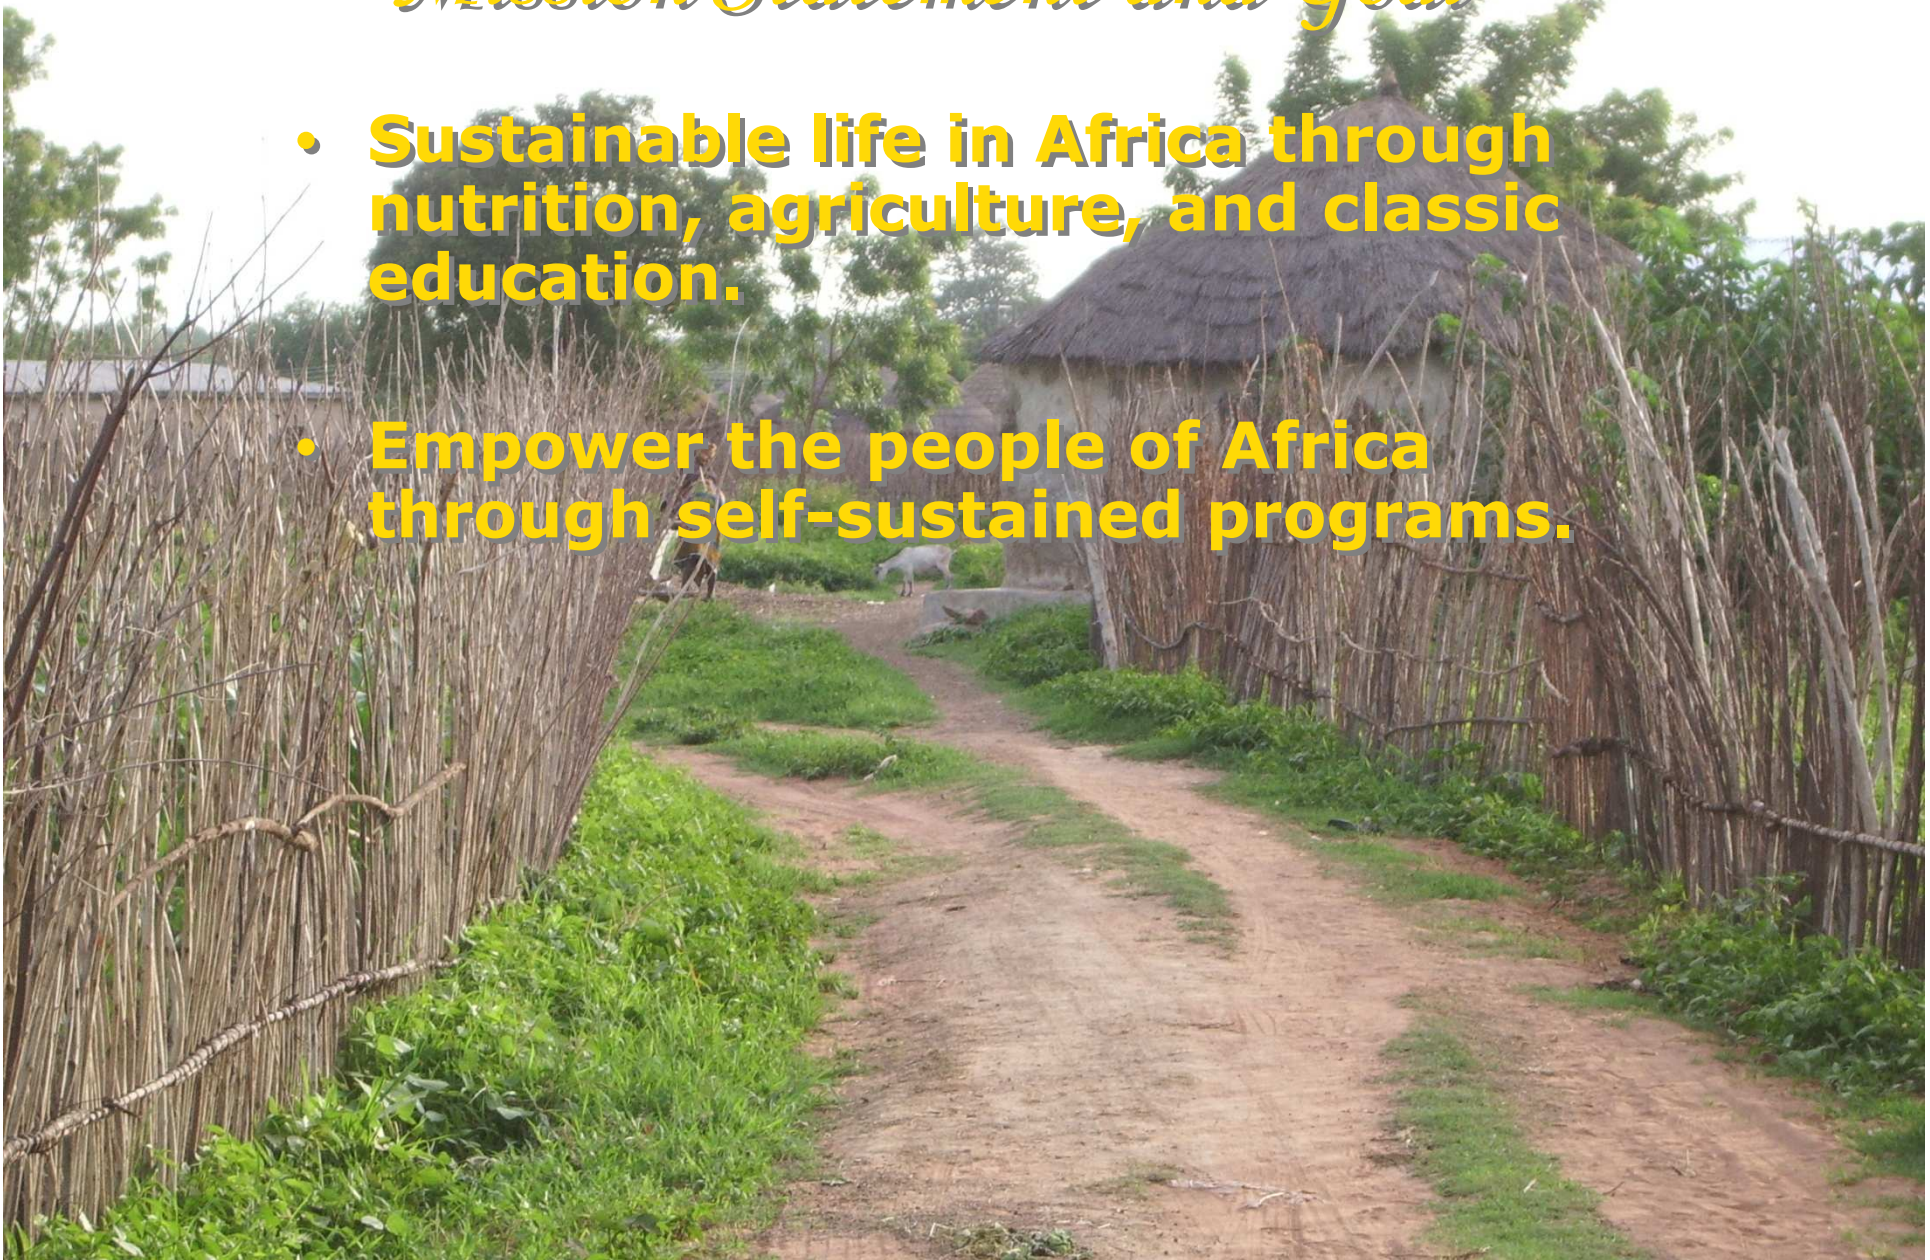

- Sanatu was an orphan
- Malnutrition and Malaria almost took her life
- She has a living father
- Adoption

## *Mission Statement and Goal*

- **Sustainable life in Africa through nutrition, agriculture, and classic education.**
- **Empower the people of Africa through self-sustained programs.**

# *Nutrition*

- **G.R.A.A.C.E. has adopted the nutrition expertise of James Simmons' plant-based diet ([www.originalfastfoods.com](http://www.originalfastfoods.com)).**
- **Flip charts are taught to village volunteers, who then teach the rest of the village.**

# *Agriculture*

- We have a plot of land which is our school for teaching agricultural practices.
- We use only in-country resources for all agriculture programs.
- We teach square foot gardening, and the cost to begin an entire village is 100 cedis (approximately equivalent to 80 U.S. dollars).

# *Education*

- Literacy Programs
- Solfege- Sight Singing
- Classic Literature that is localized (based on folk, traditional, and popular music)

# *Global Sanitation Solutions and G.R.A.A.C.E.*

- What is Chemisan? A non-toxic chemical that significantly reduces harmful pathogens when applied to human fecal matter. It also breaks the matter down into a workable hummus, or fertilizer (chemisan.com).
